Myszę, że przeczytawszy to, co wcześniej, Czytelnicy sami znajdą odpowiedź. Nie E!

KOMUNIKAT

First Step to Nobel Prize in Physics **Pierwszy krok ku Nagrodzie Nobla z Fizyki**

Prof. dr hab. Henryk Szymczak
Instytut Fizyki PAN, Warszawa

Institute of Physics, Polish Academy of Sciences (Warsaw – Poland), announces The Nineteenth International Competition

FIRST STEP TO NOBEL PRIZE IN PHYSICS

This is an International Competition in Physics Research Projects for High School (Lyceum) Students. The competition targets high school (lyceum) students who are interested in physics and are willing to perform their own research works in physics. At times, their results are very interesting and valuable. The Institute of Physics (in the Polish Academy of Sciences) organizes the nineteenth competition in the 2010/2011 academic year, and invites the participation of students based on the rules given in the Internet. The title of the competition expresses dreams of all the physicists, especially of young physicists. We, however, feel necessary to underline that the FIRST STEP is a quite independent competition, without any links to any Nobel institution.
